

WASTE HANDLING SYSTEMS & WASTE COMPACTORS

Delitek AS was established in 1991 and has since then developed and produced a series of stainless-steel waste disposal compactors specially designed for use onboard ships, on offshore installations and also for the land-based fish industry.

Onboard & Offshore Solutions

Delitek's range of stainless-steel waste compactors designed for use onboard vessels and offshore installations are capable of withstanding the most severe weather conditions. Both compactor and container are fabricated in stainless steel to ensure a corrosion-free lifetime with low operating costs. These compactors have been delivered to factory trawlers, passenger ships, ferries, offshore platforms, and offshore service vessels and tankers on both domestic and international routes.

Product Range

A short summary of Delitek's range of waste compactors:

- **DT-500 & DT-1500 Waste Compactors**
Designed for use onboard ships and offshore installations, built with container cubic capacities of 0.5 m³ or 1.5 m³ and compacting capacity up to 15 tons respectively. Waste is compacted into a removable container fitted with a specially designed bag, which if necessary can be sealed and stored onboard.

- **DT-1000B & DT-1500B Bale Compactors**
Compactors for recyclable packaging waste such as paper, carton and PVC materials.

- **DT-500 COMBI Combined Waste Compactor & Baler**
Combines the advantages from both the waste and bale compactors in one compact, two-chamber unit.

- **DT-2000 Waste Compactor**
Similar in design to the DT-500/1500 compactors, but equipped with a special container to accommodate a standard garbage truck's lifting system. An ideal solution for the land-based fish industry.
- **DT-80/100 Oil Filter Compactors**
Powerful hydraulic compactors that completely empty the oil filter. The extracted waste oil from the

filter is drained into a separate tank or barrel and delivered onshore.

- **DT-500 GC Glass Crusher**
A modified version of the DT-500, specially designed for crushing glass bottles and metal boxes (tins).
