

Range of Products

Oil & Gas

Excellent products and services

The company was established in 1895 by Daniel Westad and manufactured initially valves to local pulp and paper industry. Various transitions in the industry allowed Westad to start serving the Marine industry around 1950.

With the arrival of oil and gas production in Norway in the late 1970-ties, Westad adapted its product lines to serve this demanding market segment. Material requirements increased, and Westad delivered on its reputation. Special stainless steel materials like Titanium, Duplex, Super-duplex and 6MO became the common materials for valves in demanding services. Westad aims to be the leading supplier of high tech butterfly valves and ball valves for LNG, LPG, chemicals and other critical applications.

Westad is a well reputed supplier of valves to the Marine Industry, Oil & Gas downstream and Oil & Gas upstream.

Westad has for decades delivered butterfly valve packages to the offshore industry, the last major project being to Skarv/Idun. We are also providing valves to the FPSO business.

Westad Industri AS is located at Geithus approximately 70 km outside Oslo.

Products

Cryoseal

High Performance Butterfly Valve for LNG
- Double and Triple Offset

Pressure rating:	ANSI Class 150 / 300 / 600
Temperature range:	+200°C to -196°C
Size range:	DN 80 - 1200
Materials:	Stainless Steel CF8M and CF3M
Types:	Flanged and butt welded
Services:	On / Off and throttling service in LNG systems

Scorpio

High Performance Butterfly Valve
- Double and Triple Offset

Pressure rating:	ANSI Class 150 / 300 / 600
Temperature range:	+450°C to -110°C
Size range:	DN 80 - 1200
Materials:	Stainless Steel AISI 316/316L, Duplex, Super Duplex, 6Mo, Titanium, Ni-Al-Bronze and others on request
Types:	Wafer, flanged and lug
Services:	LPG/LEG (Cryogenic), Chemicals and Oil products
