MAN Engines

MAN ENGINES AS AUXILIARY GENSETS

Renowned manufacturers of auxiliary gensets and emergency gensets often use MAN engines. Reliable, durable and economical, MAN engines serve their purpose well in the power range from 190 kW to 800 kW.

A RELIABLE DRIVING FORCE

Customer Benefits

- Low fuel consumption in a wide range of engine loads
- Maximum power output with a quick load pick-up
- Class-leading compactness for a space-saving design
- Best fuel consumption values and long service intervals minimizing the TCO
- Low acoustics and low vibrations
- World-wide service network with rapid spare parts supply

AUXILIARY GENSETS

Characteristics

- Annual operating hours: $\leq 5\,500\text{ h}$
- Average load application: $\leq 75\%$

EMERGENCY GENSETS

Characteristics

- Annual operating hours: $\leq 1\,000\text{ h}$
- Average load application: unlimited

EXHAUST AFTERTREATMENT

Flexibility makes use of free space – also when it comes to exhaust gas aftertreatment: Individual components of the modular EGA kit from MAN Engines, which can be positioned variably, enable a wide range of installation variants as well as maximum design freedom when installed in machinery and vehicles.

Alternatively, pre-defined complete systems offer practical, space-saving solutions.

Dimensions

Type designation		SCR system
A-Overall width	mm	500
B-Overall length	mm	950
C-Overall height	mm	655
Average weight of SCR system	kg	115

For detailed examinations of installation dimensions, please order drawings from our factory.

WARRANTY

MAN Warranty Relaxing and calculable

With MAN engines for marine gensets you are on the safe side since MAN Engines goes one step further. With the **“Work Plus”** Warranty you do not only extend the warranty for your engine, but it also gives you the certainty and peace of mind that you have made the right decision. In practice this means an additional year of safety for you and your engine plus attractive pricing which makes this offer even more appealing.

Two years' warranty on MAN service and parts: Higher quality, more time

We know that MAN Genuine Parts are characterised by their quality and precise fit. Combined with the qualified and professional work at MAN service centres, they ensure reliability: reduced downtimes and a longer service life. We are now passing this security on to you. Instead of the one year we offer now the two years' warranty on MAN Genuine Parts and MAN Genuine Parts ecoline. That means double the security for you.

The MAN Truck & Bus AG two-year warranty is valid for all repairs carried out at MAN service centres ¹⁾ from 2017 ²⁾ onwards, including repairs where MAN Genuine Parts and MAN Genuine Parts ecoline are fitted. The scope of service is identical to the previously valid one-year warranty. Please refer to our General Terms & Conditions for more information.

We cover the following costs as part of a warranty case:

- Costs for work time and spare parts directly related to the repair of the defect or to the exchange of faulty parts.
- Installation and removal costs are covered if the original scope of delivery also included the installation of the part ³⁾.
- Certain additional costs are covered after inspection, night time/weekend charges, on-site repairs, courier costs.

Our genuine engines deserve MAN Genuine Parts – now with two years' warranty.

1) MAN-owned service outlets and participating partners

2) See validity of the General Terms & Conditions

3) Installation and removal costs are not covered in the case of counter sales

D2676

Characteristics

- Cylinders and arrangement: 6 cylinders in-line
- Operation mode: 4-stroke diesel engine, watercooled
- Turbocharging: Turbocharger with charge air intercooler and wastegate
- Number of valves: 4 valves per cylinder
- Fuel system: Common Rail direct fuel injection with electronic control
- Engine block: High-strength casting with integrated oil and water ducts and replaceable cylinder liners
- Engine lubrication: Force-feed lubrication, lubrication oil cooler in the cooling water circuit of the engine
- Type of cooling: Heat exchanger with engine and seawater circuit or for keel cooling
- Engine control: Electronic engine monitoring including diagnostic unit
- Fuel: DIN EN 590

D2676
