EnwaMatic Maritime

Water treatment for HVAC and engine cooling water

NO CHEMICALS
NO PROBLEM

- Corrosion inhibition through pH regulation
- Scale control
- Side stream filtration to < 5 microns
- Environmental control of bacterial growth
- Air separation

WATER TREATMENT THAT PAYS
EnwaMatic®
Maritime benefits

- Environmentally sound technology
- Continuous filtration and self-regulating water treatment
- Reduced energy consumption
- Extended life time
- Reduced service and maintenance costs
- Cost effective alternative to chemical dosing

The stainless steel filter tank is insulated with thermo foam and encapsulated in a tough plastic outer casing. The design incorporates side steps for easy maintenance, which double as lifting handles. Mounting holes are fitted as standard for securing the units to the floor.

Automated Backwash
Option Features include:

A fully enclosed, IP 54 rated, wall mounted control panel.
Programmable log for operation and backwash.
Single phase, 220 v supply, 24 volt output as standard.
Visual alarm and output signal for optional connection to IAS.
Alarm test function.
Manual override function.

Capacity is the total volume of water within the closed loop of cooling/heating water. Weight empty is the dead weight without filter media. Weight full is the calculated weight inclusive filter media and water. Optional: real-time monitoring with alarm functions.
The World, ResidenSea

I have been working in the air conditioning and refrigeration business for forty years, on land and at sea and used both chemical and anodic-cathodic methods to treat the water systems. ENWA is definitely the best I have come across. The low maintenance and good reliability is what I like the best with ENWA.

Didrik Stene, Chief Refrigeration Engineer, The World

Hurtigruten

After 110 000 hours of operation our recent service and inspection has shown no corrosion, we are very satisfied with the performance of the EnwaMatic® units

Pål Åsheim, Chief Engineer, Hurtigruten ASA

The EnwaMatic® Maritime Technology has obtained approval from engine manufacturer Wärtsilä.

The recent approval of the EnwaMatic® water treatment system was preceded by several years approval period with the final test running for 16,378 engine hours. In connection with the intense testing period, the ship owner Color Line, operating several cruise ferries, has decided to change all closed loop water systems for engines and HVAC systems on their entire fleet to EnwaMatic® Maritime.
