FL NavFleet

Enabling simply better
decision making

NavFleet is the ultimate fleet management and decision support tool. Lower costs, enhance efficiency, improve understanding and optimise the performance of your vessels with one simple, integrated and powerful data-driven system.

Take control, with NavFleet.

FL NavFleet

Enter a new age of efficiency, insight and performance with the **ultimate fleet management tool**

- NavFleet is a shoreside application integrating data across your vessels, organisation and from business-critical sources to deliver unique insights and optimal decision making.

- Simplify compliance and control your carbon footprint with flexible, real-time fleet monitoring.

- Access the intelligence to meet all charter party, and business, requirements
  - NavFleet combines vessel sensor data with weather information and passage planning to monitor operations, instantly identifying deviations.

- Create common situational awareness, and optimal teamwork, between ship and shore.
  - See if vessels deviate from passage plans, charter party guarantees and KPIs.
  - Check your vessels are on schedule, any time, anywhere.

- Simplify reporting and adminstration with Operational Report Handling (coming soon)
  - Send relevant reports (e.g Noon Reports) directly from the vessel, while delivering access through NavFleet
  - Ease the adminstrative burden for paperwork including Departure, COSP, EOSP, Noon, Anchoring, Shifting, Port, and Arrival reports.

- Automate EU MRV/IMO DCS reporting (coming soon)
  - NavFleet will monitor and generate reports in accordance with EU MRV and IMO DCS regulations.

- Simply better fleet management with a user-friendly, intuitive, and innovative system and interface.
