

STEEL GRATING

Steel grating is a kind of open plate steel member, the bearing, flat bar and cross bar are fixed by welding or pressure lock with a certain spacing to ensure a orthogonal combination. Commonly used for platform and walkways. We offer according to international standards EU: EN1090, U.K: BS4592. USA: ANSI/NAAMM

TABLE OF QUANTITY OF FLAT BARS AND NOMINAL WIDTH FOR COMMON STEEL GRATING

QUANTITY OF FLAT BARS	NOMINAL WIDTH (MM)			
	FLAT BAR PITCH (20 MM)	FLAT BAR PITCH (30 MM)	FLAT BAR PITCH (40 MM)	FLAT BAR PITCH (50 MM)
5	85	125	165	245
6	105	155	205	305
7	125	185	245	365
8	145	215	285	425
9	165	245	325	485
10	185	275	365	545
11	205	305	405	605
12	225	335	445	665
13	245	365	485	725
14	265	395	525	785
15	285	425	565	845
16	305	455	605	905
17	325	485	645	965
18	345	515	685	
19	265	545	725	
20	285	575	765	
21	405	605	805	
22	425	635	845	
23	445	665	885	
24	465	695	925	
25	485	725	965	
26	505	755	1005	
27	525	785		
28	545	815
