Georg Hauser

Marketing & Sales Director MESPAS AG

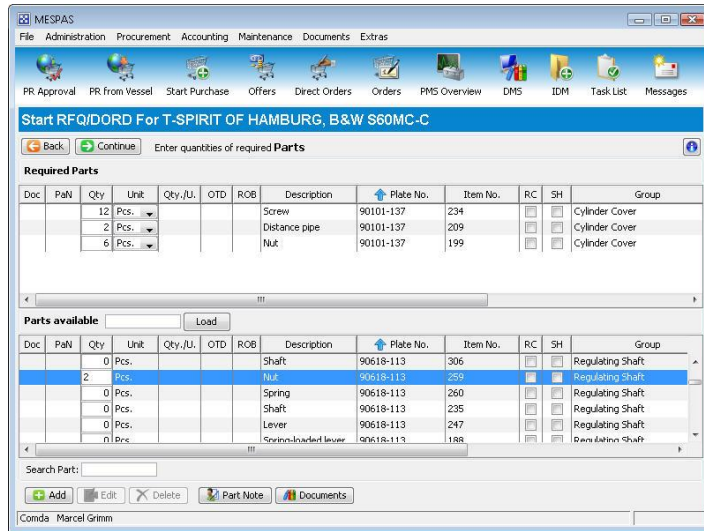

mespas R5 E-Procurement makes your procurement streamlined. The system ensures data consistency and controlled operations along the entire supply chain.

E-Procurement

INTEGRATED AND CUSTOMIZED

Machinery data of vessels across fleets are stored in **central parts catalogs**.

Purchase requests (PR) are initiated from a vessel or from the office.

SYSTEM FEATURES

The shipowner's vessel users...

- make purchase requests.
- view details of offers and orders.
- manage stock control (levels, alerts, updates, overview, movement history).

The shipowner's office users...

- process purchase requests, offers and orders (alter, approve or reject).
- compare several suppliers' offers.
- see detailed history data covering requests, offers and orders.
- evaluate suppliers' performance.

The suppliers...

- are fully electronically integrated with customers for offer- and order-processing.
- receive the mespas R5 Supplier Software free of charge.

Manage your fleet, not just your ships...

MESPAS is a Swiss-based software solution and service provider for managing technical installations such as marine fleets and industrial installations.

It was founded in 2000 by marine engineers, software engineers and venture capitalists.
