

VIKING Personal Protective Equipment – A Matter of Trust

In working environments where conditions place maximum demands on safety, VIKING's various types of immersion, work and fire suits provide a high level of protection.

VIKING is a well-experienced supplier, to fire-fighters, naval and military forces, offshore industry, commercial and shipping, passenger and cruise ships, fishing vessels and the yachting market, of protective clothing which will pass the requirements of most countries of the world.

Our suits have been designed to enable a person working either in or near water or fire, where there is a danger of accidents, to operate in complete safety. All VIKING's personal protective

equipment is designed for a variety of specialist applications in high-performance, breathable and light-weight fabrics. The range includes suits of unique designs which may be worn with ease even when fully sealed, providing complete protection at all times.

VIKING's automatically inflated or solid lifejackets for professional and yachting use have been developed to improve the safety of those persons giving high priority to quality, comfort and safety.

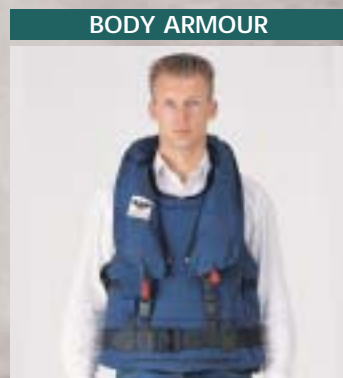

VIKING Personal Protective Equipment comprises immersion suits, fire suits and equipment, lifejackets, Fishermen's Smock, Soft Body Armour.

VIKING's lifejackets for professional and yachting use have been developed to improve safety of those persons giving high priority to quality, safety and reliability. The range of VIKING lifejackets cover a variety of capabilities and their modern design makes them comfortable and easy to wear and ensures minimum hindrance when working.

Application: Fishing vessels, offshore installations, passenger ships, cargo ships, the Navy, yachtsmen.

Approvals: SOLAS Approved acc. to EU Council Directive 96/98/EC on Marine Equipment. CE EN396 and EN1095. CSC/Circ. 922 as well as Norwegian Special Requirements.

Maritime crime is increasing and as a result waterborne Special Forces are facing higher risks of assault than ever before. When exposed to humidity, or in direct contact with water, the protection offered by standard body armour materials will decrease as much as 40% causing fatal lack of protection. The VIKING Soft Body Armour represents a new generation of body armour with integrated, inflatable or inherent buoyancy lifejacket specially developed for waterborne operations – both standard or custom-made to customer specifications.

Application: Police, Special Forces, Coast Guards, Customs and other waterborne operating task forces.

Approvals: According to international standards or customer specifications.

It is a fact that in an emergency at sea, a person's chances of survival after immersion in water are greatly improved if he can remain dry. This removes the risk of 'cold shock' the so-called hypothermia and increases the time before hypothermia sets in. VIKING's suits are designed to provide maximum protection during immersion in the sea and comfort during constant wear, either in transport or during working time.

Application: Commercial shipping, inspection and survey vessels, fishing vessels, ferries, offshore installations, rescue boats, man-overboard boats, by MES crew, and by deck hands.

Approval: 96/98/EC SOLAS. CE approved according to EN 1913-1. Approved as immersion suit for rescue crews in the summer by DMA (Danish Maritime Authority). Approved by the Icelandic Directorate of Shipping.

Aviation · Fire-fighting Equipment

Aviation

Possessing all the unique qualities of all of VIKING's immersion suits, the suits for aviation and transportation has been specially designed for airborne activities. They are developed to provide maximum protection during transportation at sea and comfort during constant wear.

Application: Pilots, air forces, helicopter transportation, special task forces, rescue teams.

Approval: Tailor-made to Air Force requirements

Fire-fighting Equipment

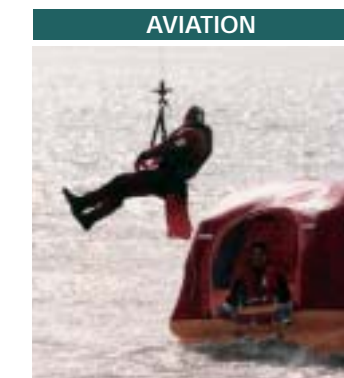

Through our many years of experience VIKING has become a professional and well-known manufacturer of personal fire-fighting equipment. Our fire-fighting suits are made specially to meet the increasing demands from fire-fighters all over the world and as a result VIKING fire-fighter suits are always tailor made to the customer's need for high protection, light weight, moveability and comfort.

Application: Offshore, commercial ships, fire brigades.

Approvals: EN-469 and 96/98/EC SOLAS or NFPA. Thus they will pass the heat and flame protection requirements of most of the countries in the world.
