

### VP1350W

On board ship gas freeing is carried out for various reasons, change of cargo, health and safety and tank maintenance is a few but it is essential that it is done efficiently and safely. All of our fans competently achieve these aims and are well respected in the marine market when used with our range of ancillaries.

The VP1350W and VP800W are high performance, water driven axial flow gas freeing fans. The non-sparking fans offered as either medium or high flow, can achieve deep penetration suitable for all types of crude oil and product tankers.
